

# Early Modern Mariners Letters international workshop

Second day introductory slides  
Colin Greenstreet

July 15<sup>th</sup> 2022

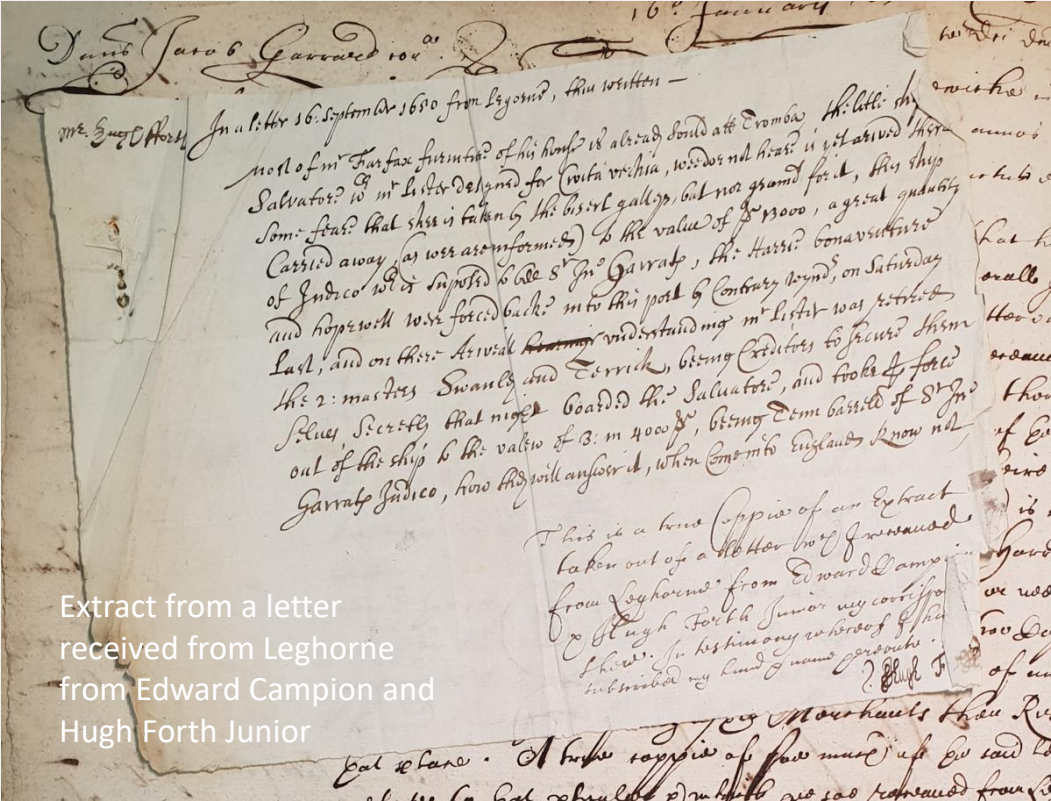

- We are finding many mariners letters in multiple languages (e.g. English, Dutch, French, Spanish, Italian, Basque) in a wide range of archives, through structured search and through serendipity
- Our speakers have sourced mariners letters in multiple languages from 1600 through to the early C19th from English High Court of Admiralty (HCA 13/20-78; HCA 13/30; HCA 13/32); from National Museum of the Royal Navy; from National Library of Scotland ... but have barely scratched the surface
- We have started to explore some potential uses from the building of corpora of mariners (and other) letters
  - Letters from common men and junior officers to family and friends show a wide range of linguistic variety not found in printed language from the same period and have considerable value to historical linguists
  - Mariners letters, conceptualised and studied as part of a combined sea and land Early Modern commercial information system, have the potential to challenge and broaden land and merchant centric thinking about Early Modern communication
- We have started to surface some interesting themes
  - Relationship of hybrid languages and their variants (North Sea tongue; Lingua Franca) and regional languages or dialects (Basque; Breton) to written expression in mariners letters
  - Possibility (debated both ways at the seminar) that there were distinct forms of letter writing by mariners (as distinct from other occupations such as merchants and tradespeople)
- We have started to develop some interesting hypotheses
  - High level of mariner literacy at all levels (common men, junior officers, senior officers) and nature of voyages (often multi-nodal, with frequent port stops) was conducive for reading, writing, sending, and receiving mariners letters
  - Litigiousness of Early Modern English (and other European) societies encouraged commitment of plans and actions to letters to ensure a written, legally useful record
  - Relatively high frequency of personal letter writing from common men and junior officers to wives, family, friends
  - Context of interception of letters in Prize Papers means that there is plenty of contextual information about the identity and status of mariner letter writer and recipients on board ships

- Estimates of the assumed number of letters originating from seafarers in the EM period are generally not contradicted by the participants, the estimates just vary somewhat (e.g. 100 000 letters between 1793-98 Helen Watt, 10 million for both centuries Colin).
- Reasons identified for the absence of Mariner Letters in today's archives: loss, sorting out, destruction/burning, repurposing (used as wrapping paper, etc.).
- Letters in the Prize papers are unique in terms of their language variety (particularly in terms of dialects), but therefore also more complicated to understand
- He/she who searches, finds! We have to dig deeper and dare the adventure of searching in local and national archives - especially in regional archives (example France)

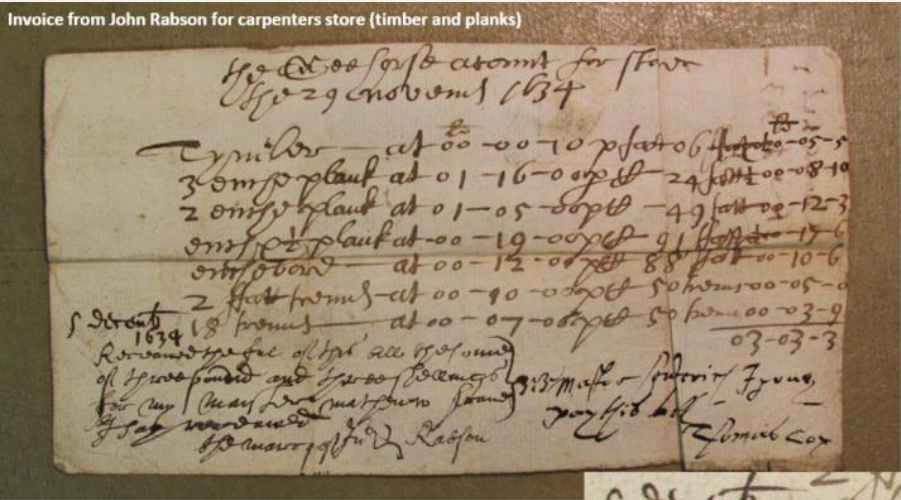

- The definition of mariners' letters needs to be sharpened: What counts as a mariner letter?
- Should we rather speak of mariners' correspondence?
- What are the special characteristics of mariners' letters?
- Are there common characteristics of mariners' letters? Form, style, material, handwriting, language? Where do they learn to write?
- What about the letters that were sent to the seamen? How can we characterise them?
- Who belongs to the group of mariners? Carpenters, sailmakers, cooks, too? What about the passengers on board (question from the audience)?
- Are there any differences in letter writing of seafarers serving in the Royal Navy and/or on merchant ships? If so, does this have anything to do with RN training/schooling? Are there different requirements for the literacy and competence of seafarers in military shipping and in commercial shipping?
- What would be the position and/or motivation for a sailor to move from being able to sign letters to be learning to write letters? Advancement to helmsman?
- What were the typical events/situations when the sailors wrote? When did they have or get the time to write? Special occasions (ships being captured, mutinies) vs. regular occasions (Christmas)
- How do we combine more macro- (e.g. on literacy rates) and micro-historical perspectives (e.g. on the careers of mariners)?
- How can we integrate seafarers and their letters from other parts of the world? North Africa, Asia. Where do we find their letters? Looking forward to today's papers!

Mariners Letters 1600-1800 International workshop: Need to build a broad corpus of Early Modern letters (and other ephemera) to see orthographic, stylistic, dialectal variation

Extract from a letter received from Leghorne from Edward Campion and Hugh Forth Junior

May I please your Honor y<sup>e</sup> 15<sup>th</sup> Instant I received  
y<sup>e</sup> Tourney orde<sup>r</sup> for to goe for Portsmouth too  
Be filled y<sup>e</sup> 12<sup>th</sup> Instant I looked in our provision  
which was a month: And I wanting some  
small stores for to carry mee a boate I sent  
my boate waine for the small demands that  
it should be for they refused: Refused for to  
deliver any without your Honor's order my Car-  
penter is lately dead and his mate is Runne  
away that I must be forced as before I sailed  
to look out for a Carpenter it was our fortune  
y<sup>e</sup> last Sunday I sailing our boate a shore  
for water it was forced by an extraordinary gale  
of wind and it landed my humble request is that  
y<sup>e</sup> Honor will be pleased to order these small  
stores for mee where y<sup>e</sup> Honor please I have  
being well supplied with since March last  
my humble request is that y<sup>e</sup> Honor please  
to direct y<sup>e</sup> order to Chatham or where y<sup>e</sup> Honor  
thinke fitt y<sup>e</sup> Honor Most Humble Servant  
to Comman

Edward Prestwich, master of the *Blessing*, was on a contract to the English Naval Board to carry English soldiers from Rochester to Deal. He wrote ten letters written solely or jointly to the Naval Board in less than two months (November 4<sup>th</sup>, 1673 to Jan 27<sup>th</sup> 1674)

- June 28, 1673: James Strong, Master, the Golden Wheatsheaf, Samuel Atkinson, Master, the Content, Peter Parsons, Master, the Greenwich, Edward Prestwich, Master, the Blessing, at Tilbury Hope, to Naval Board (ADM 106/282/34)
- Nov 4, 1673: Edward Prestwich, at Rochester, to Naval Board (ADM 106/289/228)
- Nov 9, 1673: Edward Prestwich, master of the Blessing, and Henry Lydell, master of the Marigold, at Rochester, to Naval Board (ADM 106/289/386)
- Nov 13, 1673: Henry Lydell, master of the Marigold, and Edward Prestwich, master of the Blessing, and Richard Lister, master of ?, at Rochester, to Naval Board (ADM 106/290/133)
- Nov 30, 1673: Edward Prestwich, at Rochester, to Naval Board (ADM 106/291/156)
- Dec 11, 1673: Edward Prestwich, at the Nore, to Naval Board (ADM 106/292/68)
- Dec. 18, 1673: Henry Lydell, master of the Marigold, with extra note by Edward Prestwich, master of the Blessing, at the Downs, to the Naval Board (ADM 106/292/236)
- Dec. 25, 1673: Edward Prestwich, at the Downs, to the Naval Board (ADM 106/293/95)
- Jan 3, 1674: Edward Prestwich to Naval Board (ADM 106/302/177)
- Jan 16, 1674: Edward Prestwich, master of the Blessing, at Deal, to the Naval Board (ADM 106/302/179)
- Jan 27, 1674: Edward Prestwich to Naval Board (ADM 106/302/181)
